CDNAMESEARCH NEWS

8.5 SNEAK PEAK

The CDNameSearch staff has been working hard to bring you the best CDNameSearch release yet! We're proud to present you with this sneak peak of its ground-breaking, new features and winning enhancements.

Multi-Database Searching

The ability to search with both CIPO and USPTO databases simultaneously is a reality! Months of diligent work have gone into the creation of this easy to use feature, and we're happy to say that despite the strain of searching more than one database at a time, search times remain quick and efficient.

Improved Reports

The old set of reports is out, and in its place comes a brand new, highly customizable, professional looking set of reports. You'll find the report types you're used to still available, and new ones up for grab too.

Preview reports before printing, or Export them in PDF, Word and many other formats. Customize a report's title, header and footer, and add personal or company information too. These customization options and many more will be at your finger-tips.

Web Services

Search over the web from anywhere using CDNameSearch 8.5 itself. Get the cost-savings of internet searching with the enhanced abilities of 8.5, or use the Web Services along side your optical databases thanks to multi-database searching.

Transition Enhancements

- Double click the category button to keep a TIP
- The number of TIPs in a Booklet is shown.
- Search criteria appears in a TIP Booklet's title bar.
- Disable categories and search criteria in reports.

Online News

We've integrated an RSS aggregator into CDNameSearch. This means we can send you urgent information or industry news directly, keeping you informed and up-to-date. The newsletter will also be available in this format. CDNameSearch groups and sorts them automatically, saving you time and cabinet space.

Government PageView

See the government's current, official data on a selected trademark in this new PageView tab.

Searcher Comments

Gain the ability to add comments to a TIP and have them appear on reports too.

General Enhancements

∗ TIPs can be dragged and dropped between Booklets.

∗ The Secondary Search dialogs have been overhauled to be easier to use.

∗ Hover the mouse over a Class in the Class Search Dialog to display the English summary of that class.
